

OCEAN, AIR & GROUND RATES & BOOKINGS

Accelerate Speed to Quote
and Win More Deals

Boost productivity and profit margins when you optimize the quoting and booking process with Magaya Rate Management, Magaya Supply Chain, and Magaya Digital Freight Portal.

Create quotes and manage rates across ocean, air, and ground faster and more efficiently than ever with Magaya Rate Management. Choose the level of service that suits your business best, including self-service and full-service rate management with your carriers. Access a comprehensive database of surcharges and floating tariffs. Store, manage, and publish tariff rates. Work with spot rates, add free time, schedules, and even import Xeneta benchmark data with ease.

Quotes created in Magaya Rate Management can be sent to Magaya Supply Chain, updating the Quotation List for air, ocean, or ground shipments. Additionally, your shipper customers can access your custom-branded, self-service Magaya Digital Freight Portal, where they can search for rates and schedules to request a quote or booking, getting you from RFQ to shipment faster than ever!

Ocean

Retrieve, update, and maintain contract and spot rates with ocean carriers using Magaya Rate Management, or opt for fully-managed services to save even more time. Connect to the INTTRA network of ocean carriers and send booking requests through the Magaya Supply Chain integration. When used together, rates and sailing schedules from Magaya Rate Management are automatically available in the Magaya Digital Freight Portal for your customers to access.

Air

Access and compare rates, schedules, availability, and capacity from all the major airlines, and book directly with the carrier via the Magaya Rate Management or Magaya Supply Chain Air eBooking integration. The confirmed bookings are sent back to Magaya Rate Management and Magaya Supply Chain.*

Ground

Manage all your ground rates with Magaya Rate Management via an upload or API to a third-party ground rate provider. Additionally, with Magaya Quote Automation, you can receive quote requests, gather rates from multiple carriers, and bring everything back into an email in an instant, leveraging the best LTL and FTL rates on the market.

* Air eBooking integration for Magaya Supply Chain is coming soon

FEATURES

Magaya Rate Management

A single control tower for searching and comparing ocean, air, and ground rates, managing margins, filing tariffs, responding to RFQs, and preparing winning quotes.

- Supercharge the efficiency of your whole quote and procurement processes with a single control tower across all modes.
- Retrieve and compare schedules, view availability and pricing, as well as book and track shipments all in one place.
- Access accurate surcharges with a comprehensive database of tariff surcharges.
- Live access to rates, schedules, availability, and capacity from all the major airlines & GSA partners.
- Easily manage contract rates yourself or let our expert contract management team maintain complex contracts, so your team can focus on other high-value tasks.
- Search for carrier spot rates.
- Leverage an industry-leading API that connects you to the most carriers.
- Win more business faster with mobile quoting, full quote history, and custom forms.
- Keep your NRAs and quotes organized in a secure, FMC-compliant document repository that gives users throughout the company instant access to NRAs, eliminating the need to keep them in emails and/or hard drives.
- Stay compliant with an intuitive traffic light system that allows users to easily create a filing from a quote in seconds with the NRA-compliant quote process, or efficiently upload multiple filings at once with the bulk filing option.

Magaya Supply Chain

Your freight operating system to efficiently manage shipping, receiving, warehousing, and freight forwarding.

- Access a self-service rate table for all modes of transportation.
- Live access to rates, schedules, availability, and capacity from all the major airlines. *
- Track air shipments with up-to-date access to the latest status and events directly from within the events tab of a Magaya Supply Chain booking or shipment, using a valid AWB number, eliminating the need to navigate multiple sources.
- Create booking requests and send them to ocean carriers via INTTRA. Booking statuses automatically sync to Magaya Supply Chain and are displayed in the Digital Freight Portal as well as LiveTrack mobile app by Magaya.
- Seamlessly exchange data in real-time and manage all your logistics operations in a single system, from creating a freight quote to completing the necessary customs documentation, performing warehouse management procedures, tracking, and last-mile logistics.
- Avoid double data entry by creating bookings, pickup orders, warehouse receipts, shipments, and invoices, directly from one system.

Magaya Digital Freight Portal

A custom-branded, interactive digital customer experience portal with all the functionality to become a digital forwarder.

- Your customers can request quotes and receive rapid responses when you use spot and contract rates with multiple or single pricing options per trade lane, differentiate per product.
- Create complex multimodal, multileg routes easily with simple and clear design, highlighting the most important calls to action. Customers can leverage the Google Maps interface that displays routing options graphically and even convert a schedule into a booking or save it for later.
- Start from a quote, schedule, or copy a previous booking to save time inputting details with the ability to save bookings as drafts. Instantly send bookings to Magaya Supply Chain or the TMS/ERP of your choice.
